

M&L FIELD BK 147

continuing E. along South boundary of Sect 2 I found a 4"x4" post 1' above ground at 3759.3 on line. I set a 4"x4" redwood post at 3957.3 thus giving the distance called for in lot 16 Sec 11. Total distance to S.E. corner of Sec 2 was found to be 5273.7'

Beginning at the East R of W post in South boundary I run a straight line to the E. R of W post in N boundary setting 4"x4" post every 660'. I found the balance at the North end to be 666.2 ft. I set interior posts at the intersection of lines joining corresponding posts.
