

At the $\frac{1}{4}$ corner in the East boundary of Sec 12 I found an 8" x 8" wood post 6" below road surface, 10' East of West fence, 5' N of centre of concrete bridge over Holland Drain. The corner is in a straight line with the west boundary of Sec 1, and is 2637.2' distant from the S.E. corner of sec 1. I set a 4" x 4" hardwood post midway between (1318.6). I measured between this $\frac{1}{4}$ corner and the centre of section finding it to be 2640'. I set a 4" x 4" redwood post midway between (1320). Posts were set at the intersection of lines joining corresponding corners.
